

Equipment & Accessories

for your

ALPINE II[®]

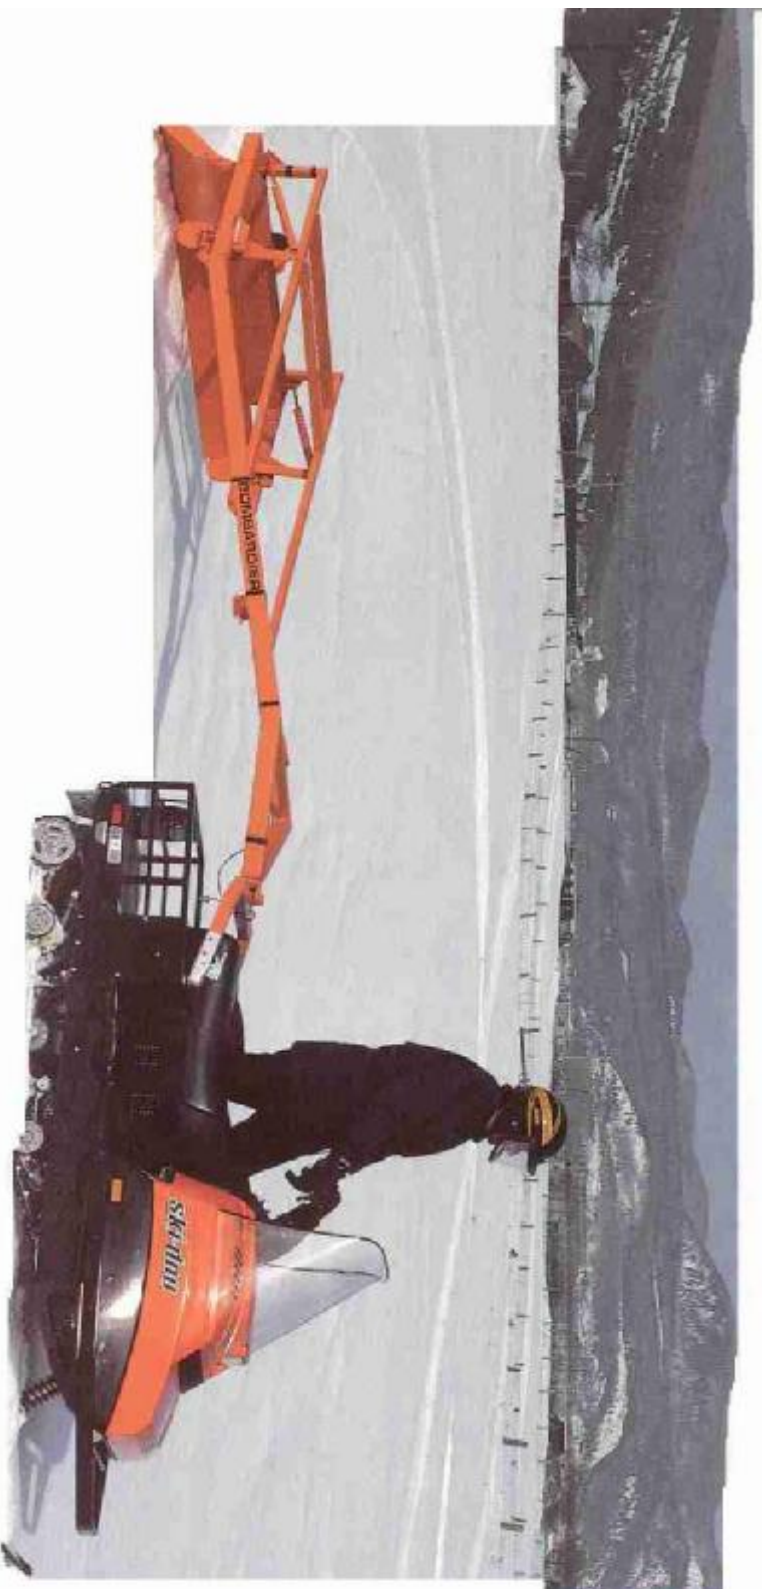

Equipment designed to give a powerful edge

Farmers, loggers, utility companies who need reliable muscle—the versatile Alpine II. With twin inches long by 16.5 inches wide credible flotation and unmatched its long list of standard features c.c. Rotax engine for hauling. It features a heavy-duty transmission, optional TRA clutch, with compound for increased torque options, on the track. And a 3-speed transmission and electric start help you handle ease.

Heavy-Duty Sleigh Chassis

The chassis has been developed especially for the Alpine II and will suit the needs of ski centers, hunters, trappers, winter fishermen, farmers, construction workers, cottage owners, snowmobile clubs, the armed Forces, the Police, etc. It is built to adapt perfectly to inconsistencies in terrain with precise weight distribution and to float over deep snow.

The telescopic bar was designed to extend 6" (15 cm) to gain enough inertia to pull heavy loads with ease and to retract an additional 3" (7.5 cm) to reduce the force exerted on the Alpine II by the sleigh when slowing down or stopping.

Trail Groomer

Developed by Bombardier for the Alpine II, this trail groomer is just the answer for snowmobile clubs concerned about the maintenance of their trail network but unable to afford the initial cost and maintenance of a large-scale trail groomer.

Optional Rear Bumper

To protect the front when

Two-Passenger Seat

able to pull a passenger under
