a new standard in
GO-ANYWHERE transportation

NEW for 61

the SNO T'RRAIN by Consolidated

The *Sno T'rrain,* the newest member of Consolidated Industries' line of go-anywhere vehicles, utilizes a unique coupling system to transfer power to all four tracks.

This four track principle has been proven in polar research in both the North and South Polar regions, and is a dependable system for vehicles that are used in snow, mud or rough terrain.

The *Sno T'rrain* will provide dependable transportation for ten persons in comfort or it could be adapted for a comfortable Safari-wagon for a smaller party. Consolidated Industries has a complete accessory line to adapt the *Sno T'rrain* for your particular transportation requirements. For example - the *Sno T'rrain* could be equipped with comfortable bunks, a two-way radio communication system, and our *GenerAC* electrical plant to provide a "complete home in the wilderness".

Write to Consolidated Industries, New Products Development Dept. for more information.
